WELCOME TO THE TRANSFORMING CARE CONFERENCE 2017

Dear participant at the 3rd Transforming Care Conference,

We heartily welcome you to the Polytechnic of Milan! We are delighted to be able to continue the Transforming Care Conference series, and we thank you very much for participating and contributing to this event.

Care policies have become an important academic and political issue around the world and as a scientific community, we need a meeting place where our research, results and ideas are presented, circulated and discussed. There is a strong need for international scientific co-operation and exchange, and stronger international comparative research. "Ce n'est qu'un début!": We will meet again in Copenhagen in June 2019.

We hope the conference will help you to enhance your research and interest in this field. And we also hope that you will enjoy Milan, its cultural values and vibrant social atmosphere.

We thank the Polytechnic of Milan, the Department of Architecture and Urban Studies, and KORA, for the support given to this conference. We also wish to thank the scientific committee for valuable advice in planning this event.

THIS CONFERENCE

Care policies not only need to respond to changing needs by providing good quality services, but also to be financially and socially sustainable, in a long-term and inter-generational perspective, and from the perspectives of care users, their families and paid care workers. This is a difficult challenge for policies as well as for informal and formal care practices, with strong implications as to how care services and care work are organized and provided.

The conference focuses on the tensions between policy and social innovation in care policies on the one hand, and pressures for financial and social sustainability of care systems on the other. This complex topic will be addressed from different perspectives through 20 thematic panels, 5 symposia, 3 keynote addresses, and a final round table discussion.

Thematic panels are organized in five parallel tracks:

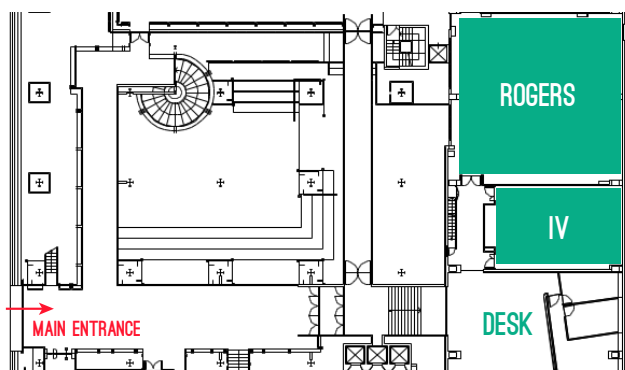

- Care policy and institutional setting
- Innovation and trade-offs in care services
- Intergenerational care arrangements and informal care
- Care work and changing care arrangements
- Care policy in different care regimes

The conference addresses transforming trends in the following fields: childcare and care for frail older people as well as for people with disabilities, in an attempt to capture not only the specific features of these fields but also their commonalities and transversal themes.
